Course Information

Course Title	PL-7002 Create and Manage Automated Processes by using Power Automate
Course Reference	C903
Training Provider	Tertiary Infotech Academy Pte Ltd (UEN 201200696W)
Duration	1 day · 7.5 instructional hours (8 scheduled hours excluding lunch, including tea breaks)
Daily Timing	9:30 am - 6:30 pm (1-hour lunch; two 15-minute tea breaks; 7.5 instructional hours)
Mode	Instructor-led demonstrations with eight connected hands-on labs
Trainer	Assigned Tertiary Infotech Academy Trainer

Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Design, build, test, share, and troubleshoot cloud flows by selecting appropriate triggers, actions, recurrence settings, dynamic content, and run-history evidence.
- LO2: Implement conditional logic, approval patterns, run-after behaviour, and a conditional business process flow for a governed request lifecycle.
- LO3: Create user-driven flows that use explicit inputs, Microsoft 365 user information, date and time logic, and calendar actions while controlling duplicates and data exposure.
- LO4: Integrate SharePoint, Power Apps, Dataverse, Dynamics 365 patterns, and SQL; then monitor, share, own, and document a reliable automated process.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.

Trainer Pre-Class Provisioning Checklist

Complete this checklist before learners begin. The timed activities assume that every starter component exists in a per-learner isolated environment and remains switched off until its lab.

- Use labs/assets/c903-starter-solution-package-v1.0.md and labs/assets/trainer-provisioning-checklist.md as the authoritative pre-class provisioning contract.
- Prepare one isolated SharePoint site/list, Power Platform environment, Outlook calendar, and SQL database or schema per learner; label every resource with the assigned learner tag.
- In solution C903 Northwind Automation version 1.0.0.0, provision the inactive starter flows named C903-02-Remind-Due-Requests, C903-03-Approve-High-Priority-Request, C903-05-Create-User-Follow-Up, C903-06-Block-Follow-Up-Time, C90307A_PowerApps_Submit_Request, and C90307B_Audit_Dataverse_Request.
- Verify every named trigger, scope, condition, switch case, placeholder action, input, and response against the versioned starter package; learners configure existing cards rather than building blank flows.
- Bind only the approved per-learner SharePoint, Outlook, Office 365 Users, Dataverse, Power Apps, and SQL connection references; confirm the SQL gateway and least-privilege DDL/DML rights are healthy.
- Confirm every learner and trainer account has the required Power Apps/Power Automate premium entitlement for Dataverse and SQL, and confirm the environment DLP policy permits the documented connectors together.
- Provision the C903 Request Launcher app shell, C903 Automation Requests table, active Request ID alternate key, business-process prerequisites (table, form, and model-driven app), synthetic SharePoint baseline, and trainer-designated backup owner. Learners create the conditional business process flow in Lab 4.
- In a disposable trainer copy of C903-06-Block-Follow-Up-Time, perform the checklist's bounded Outlook connector-failure acceptance check, verify the Catch records a leaf action plus nonblank error code and message, then restore the Calendar ID, retest the success path, and discard the copy.
- Before class, keep all starter flows off, clear CalendarEventID/DataverseRowID/SQLAuditID test values, confirm DiagnosticDivisor defaults to 1, and complete every Ready check in the trainer checklist.

Record learner-level readiness in labs/assets/trainer-provisioning-checklist.md. If any Ready check fails, repair provisioning before the timed lab; do not ask learners to rebuild a missing starter during class.

Course Schedule

Day 1 — Build, govern, integrate, and operate one connected Northwind service-request automation

Time	Duration	Topic / Activity
9:30–9:50	20 min	Welcome, learning outcomes, environment check, scenario, and flow-design ground rules

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

Time	Duration	Topic / Activity
9:50–10:25	35 min	**Topic 1 - cloud-flow anatomy, trigger types, data mapping, testing, sharing, and diagnosis**
10:25–11:00	35 min	Hands-on: Lab 1: Validate the Northwind Request Intake and Create an Automated Acknowledgement
11:00–11:15	15 min	Tea break
11:15–11:45	30 min	Hands-on: Lab 2: Build a Scheduled Reminder and Diagnose a Controlled Failure
11:45–12:15	30 min	**Topic 2 - approval patterns, conditions, run-after paths, and business process flows**
12:15–13:00	45 min	Hands-on: Lab 3: Build a Priority Approval with Complete Outcome and Recovery Paths
13:00–14:00	60 min	Lunch break
14:00–14:40	40 min	Hands-on: Lab 4: Create and Traverse a Conditional Dataverse Business Process Flow
14:40–15:05	25 min	**Topic 3 - instant inputs, user profiles, date and time logic, calendars, and duplicate control**
15:05–15:35	30 min	Hands-on: Lab 5: Create a Validated User-Driven Follow-Up Flow
15:35–15:50	15 min	Tea break
15:50–16:25	35 min	Hands-on: Lab 6: Block Calendar Time with Validation and Duplicate Prevention
16:25–16:55	30 min	**Topic 4 - SharePoint, Power Apps, Dataverse, Dynamics 365 patterns, SQL, monitoring, and ownership**
16:55–17:40	45 min	Hands-on: Lab 7: Build an Idempotent Power Apps, SharePoint, Dataverse, and SQL Integration
17:40–18:20	40 min	Hands-on: Lab 8: Recover the Same Integration Run and Complete Operational Handover
18:20–18:30	10 min	Topic recaps mapped to LO1-LO4, continuing-practice plan, and questions

Total scheduled time: 480 minutes (8 hours) excluding lunch — of which 450 minutes (7.5 hours) are instructional, plus 30 minutes of tea breaks.

Lab Reference (aligned to course topics)

Topic	Coverage	Labs
Topic 01: Get Started with Power Automate	Morning foundation · 2 connected labs	Lab 1, Lab 2
Topic 02: Build Approval Flows with Power Automate	Midday decisions · 2 connected labs	Lab 3, Lab 4
Topic 03: Build Flows to Manage User Information	Afternoon personal productivity · 2 connected labs	Lab 5, Lab 6
Topic 04: Power Automate's Deep Integration Across Multiple Data Sources	Afternoon integration and operations · 2 connected labs	Lab 7, Lab 8
